

Feature Film | Crime Drama | Social Thriller | ~100 pages

Logline

When a hard-edged U.S. federal agent investigates his activist wife's murder, he uncovers a global trophy hunting empire entangled with political corruption, murder-for-profit, and ecological devastation — forcing him to choose between duty and vengeance in a war for truth no one dares to fight.

Why This Film? Why Now?

Wild Justice is not just another crime thriller — it's an unapologetic bullet through the heart of a billion-dollar lie. Set against the glossy camouflage of "conservation," the story rips the mask off legalized wildlife slaughter, political bribery, and how American corruption infects global ecosystems — all told through a tightly wound narrative lens.

This film dares to dramatize real-life horrors the world refuses to confront — not in a documentary, but in a gripping fictional feature that is entertaining, emotionally raw, and dangerous in the best way.

Impact Hook

Where most films suggest, Wild Justice exposes. Inspired by real whistleblower accounts, suspicious deaths, and a pattern of silencing voices in environmental activism, it tells a fictional story rooted in terrifying truth — because naming names gets people killed.

The project's power lies in its duality:

- It thrills like Sicario or Wind River
- It stings like Spotlight or Erin Brockovich

This isn't just a film — it's a wake-up call disguised as entertainment.

Tone + Visual Style

A gritty, atmospheric blend of noir-meets-nature:

- Slow-burn emotional depth like The Constant Gardener
- Brutal intensity like Zero Dark Thirty
- Visual poetry like Beasts of the Southern Wild

Wildlife scenes is lush & sacred — contrasting the horror of commodification with the beauty of life worth defending.

Audience

For fans of prestige thrillers, activist cinema, and genre-bending storytelling. Wild Justice speaks to:

- Crime drama lovers (e.g., True Detective)
- Environmental + justice advocates
- A global audience ready to confront uncomfortable truths
- Distributors seeking bold, socially relevant, never-before-told narratives

Why This Project Matters

No film has ever dramatized the trophy hunting industry and its real-world power structures like this. Wild Justice is fiction — but the crimes it mirrors are horrifyingly real. In telling this story, we don't just entertain — we reveal.
